

## Securing Projects Success

### **Seminar Description:**

The success of a project is often determined by the skills and commitment of the people involved, they need to see the big picture and understand how to contribute to the project objectives.

Cayenne helps people be better prepared to deal with unexpected events and changing project conditions.

Cayenne supports the knowledge gained in technical project management courses and complements that knowledge by providing insights about human interaction dynamics among the various stakeholders and how it affects the success rate of projects.

### **Seminar Elements:**

- 6 teams running a project and competing for the best results and project success
- Key elements of the simulation:
  - How to add business value?
  - How to allocate resources and set priorities?
